

Judy Ann From Scholar to Employee

Judy Ann and her Family

Judy Ann lives in Pasay City and is the eldest of 7 children. Her father works as a construction worker in the building industry whilst her mother spends her time taking care of the family.

Judy Ann enjoys spending time with family and friends sharing stories and socialising and regularly attends Church with her family. Her favourite past-time is singing and one day dreams of being very successful. Judy Ann also enjoys watching television and reading books.

Cararoo Foundation Scholar

How did you hear about the Cararoo Foundation?

Our neighbour recommended the programme. The Foundation provides education scholarships from Elementary to High School and only those students who show good school results qualify for a college scholarship. Students sit for college entrance exam. to qualify. My Mother was interviewed although she didn't really understand the programme. We were all delighted when Cararoo provided myself and 2 of my sisters with a scholarship.

How did you feel when Cararoo offered you a scholarship grant?

I was extremely grateful and happy when I found out. I would not have been able to attend College and study without the scholarship. This opportunity helped me towards one of my life's goals.

What are the unforgettable experiences provided by Cararoo?

Cararoo are so giving and caring in providing gifts and great experiences to children that wouldn't otherwise get the opportunity, in particular the Christmas party.

Do you have any advice for other foundation members on how to succeed?

Don't waste the opportunity given to you as the scholarship is a special gift. This will help you achieve your goals in life. Also remember to repay the people who supported your studies by contributing your time, and effort to the foundation.

Working at iSphere Global

How did you feel when you first came to work at iSphere Global?

iSphere Global provided work experience (on job training) during the last 2 years of my IT College course so I was familiar with the working environment and staff. Being offered a position after completing my course has made me very excited and happy. I was initially nervous as I am shy and I also felt anxious that I may not be able to complete the tasks given to me. It was a strange feeling being nervous and excited all at the same time.

Do you enjoy working at iSphere Global?

I am happy with the support and guidance my colleagues and Managers have shown me. It feels like a family as everyone is friendly and ready to assist me if I need it.

Do you see a long and rewarding career working at iSphere Global?

I have many things to learn and experience to gain now I am in the workforce and I am hoping that I will be with iSphere Global for a long time to come. I feel this is the right place for me to be to advance my career and learn from my colleagues.
